

ROUES

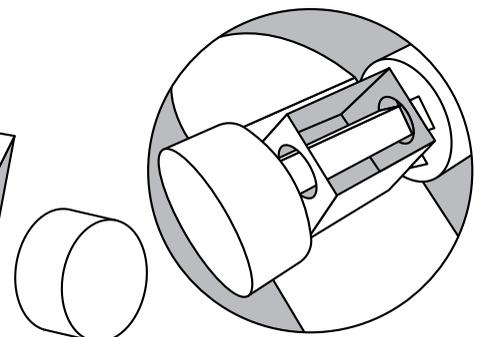

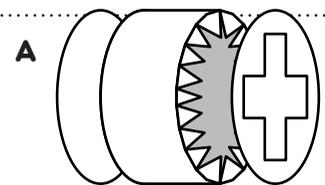

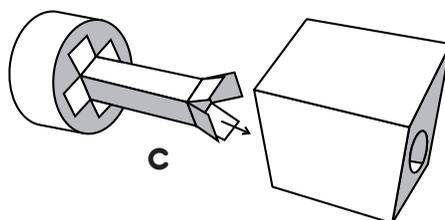

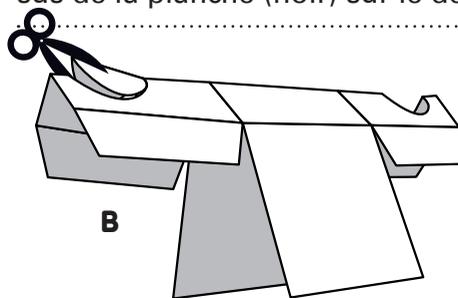

MODE D'EMPLOI

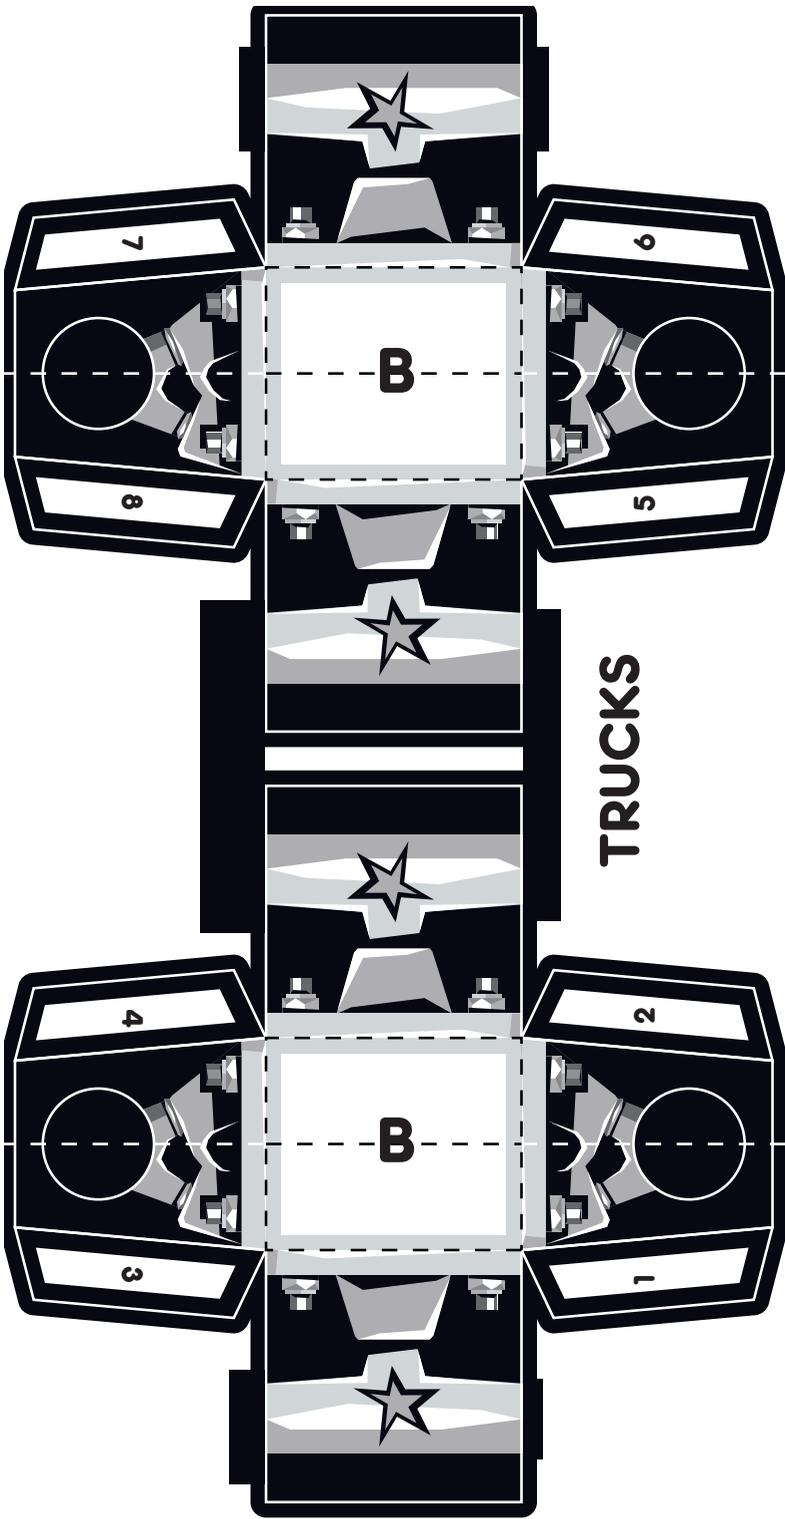

1. Découpe toutes les parties du **skate** et plie les **languettes**.

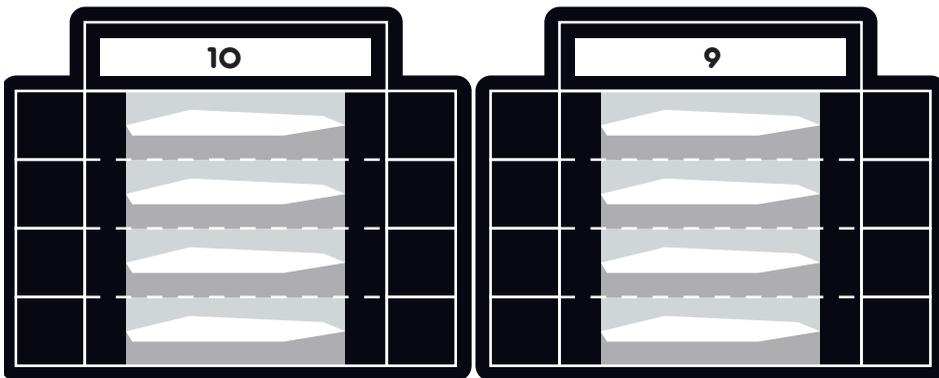

2. Fabrique les **4 roues** selon le schéma **A** (ci-dessous à droite).

3. Fabrique les **trucks** (= les axes sur lesquels on fixe les roues) selon les schémas **B** et **C**, puis assemble le tout et colle le dessus de la planche (noir) sur le dessous.
